## PRESS RELEASE

### **Forsbrand Telecom and Venturi Wireless Deliver European-first Hosted Wireless Data Optimization Offering**

*Companies Partner to Bring Affordable Mobile Broadband Data Services Optimization to European Mobile Operator Community*

**SUNNYVALE, Calif.—October 1, 2007—** Forsbrand Telecom and Venturi Wireless today announced an agreement to provide European mobile operators with a hosted option for enhancing their mobile broadband data service offerings. The new hosted service, which will be available during the fourth quarter of 2007 enables mobile operators to quickly improve their subscribers' mobile broadband data experience while allowing the operator to avoid costly capital investment.

"Enterprises have already begun to make use of wireless broadband services to increase their efficiency and competitiveness in the market," said Magnus Forsbrand, chief executive officer, Forsbrand Telecom. "By partnering with Venturi Wireless to bring a hosted wireless broadband optimization service to the operators, we are enabling mobile operators to compete even more effectively against the incumbent fixed broadband players."

Forsbrand Telecom is leveraging Venturi Wireless' technological expertise in wireless data optimization to further enhance the speed, consistency and coverage of the existing 2.5G and 3G wireless data services offered by European mobile operators. Forsbrand Telecom has built and operates its own data optimization infrastructure, thereby allowing the company to offer the Venturi-enabled data optimization capability to mobile operators as an affordable monthly service.

"Some of the largest mobile operators in the world use Venturi's technology to optimize the wireless data service they deliver to their subscribers," said Tomas Isaksson, chief executive officer, Venturi Wireless. "Now Forsbrand Telecom is leveraging its hosting expertise to make that same technology available as a service, enabling operators to quickly and profitably expand and promote their wireless data offering. We feel this is a powerful combination that will be well received by the market."

#### **About Forsbrand Telecom**

Forsbrand Telecom makes the Enterprises more efficient with Workfone™ Mobile Enterprise Services. Forsbrand Telecom helps operators and large Enterprises in Europe by handling, packaging, launching and running Mobile Enterprise Services. Forsbrand Telecom also develops Enterprise Solutions through our Wireless Office Team with competence from marketing & Technology for projects from design to launch.
